**MEMORANDUM**

TO: Mr. Joe Lister, PE  
Office Engineer

ATTN: Mr. Bryan Nichols

FROM: Kyle M. Leverette, PE *KML*  
State Construction Engineer

RE: Revisions to List V-1, Reflective Sheeting for Traffic Control  
Revisions to Special Project Details SPD 74001 and SPD 74007

In October 2019, the Department notified sign sheeting manufacturers and traffic control subcontractors that the following changes would be effective on January 1, 2021:

- 1) Retroreflective sheeting for channelizing drums and cones would be limited to Type IV orange and white sheeting, with fluorescent color required for orange sheeting.
- 2) Retroreflective sheeting for Type III barricades would be limited to Type XI orange and white sheeting specifically designed for barricades.

Please notify bidders in the upcoming January 2021 letting that these changes are now in effect and are reflected in the following document revisions:

<u>Revision Date</u>	<u>Document</u>
December 10, 2020	Special Project Detail 74001 Perforated Square Steel Tubing Barricades, Type I, II, and III; Vertical Panels Type I and II
January 5, 2021	Special Project Detail 74007 Details for Traffic Channelization Devices
January 8, 2021	MSDSAR Manual List V-1, Reflective Sheeting for Traffic Control

Let me know if you have any questions.
