

# Alabama Department of Transportation - Proposal Questions and Answers

Project Number NH-0012(577)

Call # 017

County

MONROE

## Project Description

for constructing the Micro-Milling, Resurfacing (Scrub Seal), and Traffic Stripe on SR-12 (US-84) from a point 0.367 mile east of the intersection of CR-1 to the junction of Hooks Road southwest of Monroeville. Length 9.552 mi. In the County of MONROE, State of Alabama.

As of: 11/22/2022

Item	Question	Answer
1	<p>Regarding Item 430B043; Aggregate Surfacing (1,000 tons), is it the intent of the department to place this material at each driveway location? This is a very important question / clarification, because there are nearly 200 driveways where this material could be placed. On a previous project, it was not clearly spelled out in the plans, but we spent several weeks placing aggregate at each driveway.</p> <p>Note 303 says "placed as directed by the engineer". If at all possible, we would appreciate if this decision was made prior to the bid instead of at the time of construction...</p>	<p>The intent of the department is to place aggregate surfacing at the unpaved drives. This will be placed behind the portion paved with wearing surface widening. The "as directed by the engineer" statement will dictate the quantity placed at each one, and also if some is needed at excessive shoulder drop-offs. We plan on staying consistent but some drives may require more to ensure a safe transition onto the paved surface.</p>
