

Alabama Department of Transportation - Proposal Questions and Answers

Project Number STPUC-0075(544)

Call # 017

County

MARSHALL

Project Description

For constructing the Micro-Milling, Resurfacing, Guardrail Installation, and Traffic Stripe on SR-75 from the intersection of SR-1 (US-431) to the junction of Gary Road northeast of Albertville. Length 4.189 mi. In the County of MARSHALL, State of Alabama.

As of: 2/20/2024

Item	Question	Answer
1	1) Plan sheet 6 appears to have numerous "call-outs" identifying proposed work. However, many of these call-outs are indecipherable due to the black text used on a black, (or dark) background. Could you please provide this sheet in a legible format?	Plan sheet 6 has been updated and the aerial background has been removed from the sheet. Please see revision #1.
2	2) Could you please provide dimension data for the three slope paved islands shown on plan sheet 6? The drawing indicates that this sheet is, "NOT TO SCALE". Thus eliminating the ability to verify quantities.	After careful review by the department, sheet 6 has been updated and the three slope paved islands have detail drawings displayed on the sheet. Please see revision #1.
3	On sheet #4 of the drawings, there is a call out for use of pay item 424B-685 Lower Binder Layer Patching (1000 lbs/SY). There is not currently a pay item 424B-685 on this project. Could you please help clarify this note?	Sheet 4 has been revised to list the correct patching pay item and description located on the plan sheet. Please see revision #2.
