

# Alabama Department of Transportation - Proposal Questions and Answers

Project Number HSIP-0001(617)

Call # 018

County

MARSHALL

## Project Description

for constructing the Intersection Improvements, Acceleration Lane Extension, Traffic Signals, and Traffic Stripe on SR-1 (US-431) at SR-79 northeast of Guntersville. Length 0.313 mi. In the County of MARSHALL, State of Alabama.

As of: 9/15/2022

Item	Question	Answer
1	We are having difficulty identifying the intended location for the proposed 18" slotted drain pipe on plan sheet 5. Could a heavier line weight be used to show the intended location? Does the slotted drain go straight from Structure #9 to #4? Then straight to Structure #10? If located within an area subjected to traffic are we to utilize Std. Dwg. # HDSD-532?	Special drawing # HDSD-532 has been added to Sheets 1B and 3A with the slotted drain subject to traffic. This drawing cross references special drawing # CSP-532 so both sheets are referenced in the plans. The slotted drain runs along the edge of the slope paved island from Structure 9 to 4 and from Structure 10 to 4. Please see revision #1.
